A close-up photograph of a person's hand touching a control unit screen. The screen displays a data visualization interface with a bar chart, a green circle, and various icons. The background is blurred, showing the person's arm and shoulder.

DataView.  
Intuitive, reliable  
and efficient.

Control unit for Bühler die casting cells.

DataView opens up completely new possibilities for interaction between man and machine. Information is exchanged in real time, in an extremely user-friendly manner. The new DataView control unit makes handling the cell easier, faster and more intuitive.

# DataView for Bühler die casting cells.

## Control the entire cell with five fingers.

**Fast, intuitive machine control with **25% less programming time****

**Precise monitoring** of the casting process thanks to clear graphic display

**Optimum ease of use** thanks to combination of touch screen and manual control elements

Sophisticated design for **easy operation** of the die casting cell

**Maximum flexibility** due to freely positionable, rotatable and height-adjustable control unit

Chip card logon for **fast access to the system**

**High reliability** when subject to continuous strain in a rough foundry environment

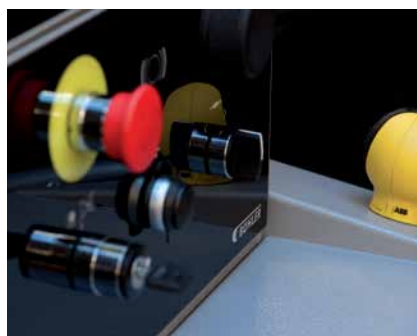

1 – Touch screen for programming and operating the die casting system

2 – Two-hand start buttons for optimum personal protection

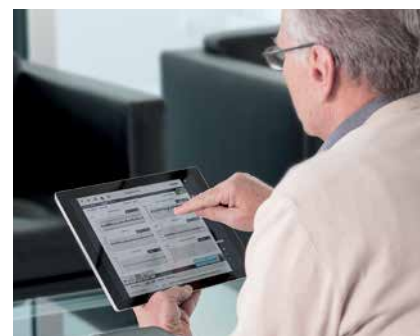

3 – Control and operating elements for system control, even with heavy gloves

Convenient operation with multi-touch screen

Reduced to the essentials

Access also from smartphones and tablets
