

Isigayo Compact Maize Mill.

Compact maize mill requiring minimum investment.

It has never been this easy to be a maize miller

Isigayo is a compact maize mill for entrepreneurs with big dreams. Its intelligent design takes up little space relative to its impressive intake capacity of 2 tons per hour. Its state-of-the-art technology enables millers to concentrate harvesting, production and consumption in one place, reducing logistics costs and maximizing space. Furthermore, the Isigayo maize mill requires minimal resources and training to operate and it can be fully operational within a week.

Designed with your investment in mind

The Isigayo maize mill is engineered as a complete milling plant. It is pre-assembled at Bühler premises inside two shipping containers. It is then quickly and easily installed at your premises, requiring very little infrastructure. If the mill ever needs to be moved, its two-part design allows an easy transport.

Reliable milling process

The Isigayo maize mill is a downscaled version of an industrial flour production site. The solution includes bag intake, cleaning, conditioning, de-germination, grinding, sifting and manual bagging of the finished product. Isigayo produces a high yield of nutritious, high quality maize meal, depending on your required end product.

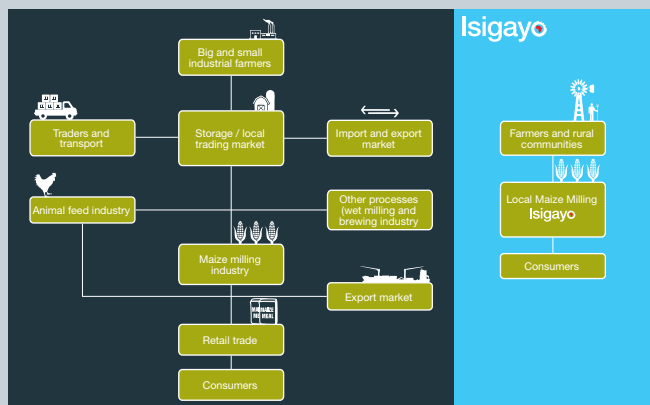

Peace of mind from the world's best

Buying an Isigayo maize mill means investing in a high quality Bühler food-processing unit that simply will not let you down. Backed by Bühler support services, an Isigayo maize mill can run 24 hours a day.

Benefits

- Pre-assembled maize mill
- High quality maize flour
- Reliable processing
- High yield

Africa's entrepreneurs uplifting Africa's communities.

Accessible to all kind of entrepreneurs

Whether you are a farmer looking to move further up the food supply chain or a miller seeking new and cost effective ways of producing nutritious, high quality maize meal, Isigayo is the mill for you. Compact, easy to start-up and requiring minimal resources to operate, Isigayo is changing the face of Africa's food production.

Uplift yourself

Break free from the restraints of the current economic situation by opening-up to new markets with high quality maize meal.

Uplift your community

By producing maize meal with Isigayo, you provide your community with an alternative, accessible source of highly nutritional food, which will ultimately boost the local economy.
