Universal Lifting Device

Transport carriage with all parts of the Universal Lifting Device

Bühler's Universal Lifting Device with the different accessories ensures a safe, organized and fast roll change.

The MDDX Universal Lifting Device was developed for roll changes on the following four and eight roller mill types:

- MDDR / MDDT
- MDDP / MDDQ
- MDDM / MDDO
- MDDK / MDDL

The entire package also comprises all specific accessories of the respective types.

The Universal Lifting Device contains:

- Universal Lifting Device
- Type-specific parts
- Roll pack transport wagon
- Assembly instructions
- Optional:
 - Wagon for bearing unit change (only for MDDR / MDDT / MDDM / MDDO)
 - Transport carriage for all types

Benefits

- High personnel safety during roll change thanks to sturdy design
- Fast and time saving preparation for roll change
- Safe storage of tools
- Tools for all types on one wagon
- Easy and safe handling due to readily to hand tools

MDDX Universal Lifting Device. Changing rolls quickly and safely.
