

Airlocks and accessories for MPSN 25/15 and 25/23.

Original spare parts
for longer lifetimes.

Grain Processing
Customer Service

Buhler airlock (air seals) valves have emerged from decades of experience in the design and development of pneumatic conveying systems. This continuous effort has produced a standardized airlock series, which satisfies stringent customer needs.

The MPSN airlock can be used as a stand-alone airlock or be installed in an array of units of various sizes in pneumatic mill stock conveying systems.

Features:

- Identical overall height for various sizes
- Compact design
- Rotor equipped with ball bearings
- Can be applied with negative and positive pressures
- Easy airlock alignment on an airlock table
- Low airlock leakage thanks to high-precision manufacture
- Drive either by spur gear motor and standard coupling or with slip-on gearing motor

The MPSN offers you the following benefits:

- High operating reliability and uptime
- Small overall dimensions thanks to compact design
- Reduced noise emissions thanks to direct drive using slip-on gearing
- Standardized rotor shaft dimensions (spare parts management)
- Application range up to a max. differential pressure of 0.5 bar
- Minimized maintenance
- High degree of hygiene / sanitation

Airlocks and accessories for MPSN 25/15 und 25/23.

MPSN accessories

Part number	Description	for size
MPSN-82001-810	Airlock MPSN – 25/15 Without gearmotor	25/15
MPSN-82000-810	Airlock MPSN – 25/23	25/23
MPSN-84003-810	Sight glass assembly 150mm diameter	25/15
MPSN-84004-810	Sight glass assembly 150mm diameter	25/23
MPS-40135-010	Rotex coupling	-
