

# Flaking Mill DOQB. PITSTOP spare parts packages.

fast – compact – perfect

Original Buhler  
parts for longer  
lifetimes.

Grain Processing  
Customer Service

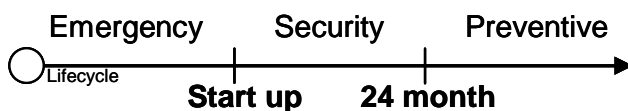

With a throughput of approximately 100,000 tons per year, the flaking mill is one of your most important machines. Due to this enormous throughput the mill is exposed to constant wear and tear.

However, the specially assembled, self-contained **Emergency, Security** and **Preventive** packages enable you to ensure the top condition and availability of your high-performance machines at all times – at attractive prices!

**fast – compact – perfect**

The PITSTOP for your flaking mills.

The right package for the right time!

## Your benefits

### Fast responses

- parts available on site
- top system uptime

### Compact spare and wear parts packages

- professional maintenance
- prevention of production loss

### Perfect genuine Buhler parts

- value retained by preventive maintenance
- best product quality thanks to perfect maintenance
