

Welcome to Bühler Aeroglide.

Perfecting thermal processing. Located in Cary, NC, USA, Bühler Aeroglide manufactures dryers, roasters, toasters, and hot air expansion systems for the food, feed, and industrial products markets. Incorporated in 1940, Bühler Aeroglide employs 230 people helping processors around the world make the most of their thermal processes.

For individual solutions.

As the market leader, Bühler Aeroglide offers thermal processing solutions and systems to suit specific customer needs. Applications include ready-to-eat cereal, snacks, fruits and vegetables, nuts and seeds, petfood and a variety of industrial products such as super absorbent polymers, rubber, and fiber.

More than just equipment.

A long history and a wide range of applications results in Bühler Aeroglide having extensive experience in thermal processes. With this experience comes the ability to provide assistance and guidance in both product and process development. A fully equipped Technical Center in Cary, and other Bühler testing labs located around

the world, provide processors with world-class facilities for perfecting their product and thermal processes.

Strong local presence.

With teams located throughout the world, rapid response to customer service inquiries is ensured. All disciplines required for after sales support are available – from project management, engineering, and automation, to installation supervisors, technologists and commissioning engineers.

Get in touch with Bühler Aeroglide!

Bühler Aeroglide will be happy to discuss your specific requirements in person and is looking forward to speaking with you soon.
