

Rice Selection Kits.

Spare and wear parts kits
for TopWhite™ whitener
BSPB.

Genuine Bühler
parts for longer life
cycles.

Grain Processing
Customer Service

The Bühler TopWhite whitener is capable of processing up to 120 metric tons of product per day. It is a key rice processing machine.

Reliable and consistently high performance is therefore crucial for ensuring your business success. In the worst case, if a key component is missing this may lead to serious financial damage.

In order to prevent a plant shutdown, Bühler experts recommend you stock the critical parts at your own site so as to have them available when needed.

The Bühler Rice Selection Kits offer the optimal basic equipment for this purpose. They have been carefully put together, based on the extensive experience of the Bühler experts.

The *Emergency* Rice Selection Kit includes:
All parts allowing a plant shutdown to be prevented.

The *Availability* Rice Selection Kit includes:
The most important parts needed to fine-tune the performance of the machine.

Specially for the TopWhite whitener, Bühler additionally offers the **Rice Maintenance Kit**. It includes the completely prepared rotor, grinding stone, and flange and reduces the repair requirements: You will do the job five times faster!

Benefits

- **10% package price advantage:** You can save money!
- Bundling of the critical parts into appropriate kits.
- Higher efficiency in ordering the kits as compared with detached parts.
- Reduction of downtimes to an absolute minimum, since the critical parts are available at your local site.
- Kits can be customized to the needs of individual machines and customers.
- Rice Maintenance Kit: Reduction of time to replace stones by a factor of 5.

Rice Selection kits are also available for:

- The TopHusk huller DRHC and the husk separator DRSD.
- The HighPoly water polisher DRPA.

Emergency + Availability = Maximum Uptime.

Emergency Kit

Kit order number: **BSPB-10093-001**

Description	Recommended number of units for one whitener	Order No.	Variant selection: Please mark with a cross.
Narrow V-belt XPB 2360mm; 50 Hz.	6	UVN -64019-135
