

Rice Selection Kits.

Spare and wear parts kits
for HighPoly™ polisher
DRPA.

Genuine Bühler
spare parts for
longer life cycles.

Grain Processing
Customer Service

The Bühler HighPoly polisher is known for its minimal product breakage and a very high throughput capacity of up to 120 metric tons of product a day. It is a key rice processing machine.

Reliable and consistently high performance is therefore crucial for ensuring your business success. In the worst case, if a key component is missing this may lead to serious financial damage.

In order to prevent a plant shutdown, Bühler experts recommend you stock the critical parts at your own site so as to have them available when needed.

The Bühler Rice Selection Kits offer the optimal basic equipment for this purpose. They have been carefully put together, based on the extensive experience of the Bühler experts.

The *Emergency* Rice Selection Kit contains:

All wear parts, which can be used to avoid system downtime.

The *Availability* Rice Selection Kit contains:

Those spare parts which experience has shown can fail. Hence you ensure the operational readiness of your machine with the Availability Kit.

Benefits

- **10% package price advantage:** You can save money!
- Bundling of the critical parts into appropriate kits.
- Higher efficiency in ordering the kits as compared with detached parts.
- Reduction of downtimes to an absolute minimum, since the critical parts are available at your local site.
- Kits can be customized to the needs of individual

Rice Selection Kits are also available for:

- The TopWhite grinding machine BSPB
- The TopHusk huller DRHC and the husk separator DRSD.

Emergency + Availability = Maximum Uptime.

Emergency Kit
