

# Destoning Screen for the MTKB Combi-cleaner.

Innovative  
retrofits for more  
efficiency.

Grain Processing  
Customer Service.

**The optimized destoning screen for the MTKB combi-cleaner offers improved self-cleaning action thus increasing the uptime of the machine.**

The double-deck design and the rubber cleaning balls installed in the clearance underneath the air distribution plate ensure permanent cleaning action. This prevents clogging of the air distribution plate and increases the maintenance intervals of the MTKB combi-cleaner. The result: enhanced sanitation and uptime of the machine.

## **Easy installation**

The dimensions and fastening points of the existing and new destoning screens are identical. This ensures easy exchanges.

## **Benefits**

- High destoning efficiency
- Self-cleaning action of the air distribution plate
- Optimal sanitation

# Destoning screen for the MTKB combi-cleaner.

## Screens for MTKB 65/120U

Retrofit material	Part number	Quantity
Long separating plate assembly	MTKB-10472-001
