

# Special offer: Filter sleeves MVR/S/T side & top removal 2400 x 120 mm.

Buhler original  
parts for longer life  
times.

Grain Processing  
Customer Service

The offer is valid as long as supplies last.

Thanks to new technology, it is now possible to weld the thermoplastics (PP, PE) used in the filter sleeves to guarantee even longer service lives.

#### Scope of services from Buhler

- **Ex-Charge®:** Continuous conductivity, can even be used in explosive areas.
- **Separator fibres made of polypropylene (PP):** Naturally water-resistant and anti-adhesive.
- **MPS fibres:** Microfibrils improve surface filtration and decrease the rise in differential pressure.
- **280g/m<sup>2</sup> weight per unit area:**
  - Better cleaning process dynamics
  - Higher permeability to air
  - Better and longer cleaning intervals
  - Lower consumption of purge air
- **Test certificates:**
  - ATEX conformity
  - Use of food-grade materials in accordance with FDA requirements

Ex-Charge® is an registered trademark of BWF Envirotec.

#### The advantages:

- System safety and ATEX conformity provided by Ex-Charge®.
- Product safety provided by using food-grade materials in accordance with FDA requirements.
- Optimised flour yield provided by high filtration efficiency.
- Cost reduction provided by longer service lives.
- Energy savings provided by lower air resistance and consumption of purge air.
- Better air supply management provided by a lower rise in differential pressure.
- Constant operating conditions provided by optimised cleaning process and lower rise in differential pressure.
- Certificates:
  - "EXAM" certificate for ATEX
  - Declaration of the manufacturer for FDA conformity
